

BETA TEST PLAN – VIGILART

1. Project context

VigilArt is a mobile and web application that helps artists track where their artworks appear online. Artists upload their artworks, and VigilArt regularly identifies and reports online reposts. When unauthorized use is detected, VigilArt helps them take action by generating DMCA takedown notices.

2. User role

The following roles will be involved in beta testing.

Role Name	Description
Artist	A user who wants to monitor their artworks.

3. Feature table

The following features will be shown during the defense.

Feature ID	User role	Feature name	Short description
F1	Artist	Sign up	Sign up with an email and password.
F2	Artist	Login	Login with an existing account.
F3	Artist	View profile	View account info.
F4	Artist	Update profile	Update account info.
F5	Artist	Delete account	Delete account.
F6	Artist	Upload artwork	Upload an artwork to the application.
F7	Artist	View artworks	View the uploaded artworks.
F8	Artist	Get artwork info	View information related to a specific artwork.
F9	Artist	Update artwork info	Update a specific artwork info.
F10	Artist	Delete artwork	Delete a specific artwork.

Feature ID	User role	Feature name	Short description
F11	Artist	Generate artworks report	Detects new reposts and reports them immediately.
F12	Artist	View all matches	View all detected reposts of your uploaded artworks (based on all reports to date).
F13	Artist	View new matches	View newly detected reposts i.e. from the latest report.
F14	Artist	View global statistics	View statistics based on all detected reposts e.g. the total number of reposts.
F15	Artist	View latest report statistics	View statistics based on the latest report.
F16	Artist	View artwork matches	View all matches of a specific artwork.
F17	Artist	View artwork new matches	View newly detected matches of a specific artwork.
F18	Artist	View artwork match info	View a match info e.g. the page URL.
F19	Artist	Sort matches	Sort matches e.g. by the website category.
F20	Artist	Filter matches	Filter matches e.g. by the website category, the report date...
F21	Artist	Generate DMCA takedown notice	Generate a DMCA takedown notice based on a detected repost and the platform where the repost was detected.
F22	Artist	Redirect to DMCA takedown platform	Redirect the artist to the corresponding platform where the repost was detected.
F23	Artist	Copy generated DMCA takedown notice	The fields of the generated DMCA takedown notice can be copied/pasted.

Feature ID	User role	Feature name	Short description
F24	Artist	Download DMCA takedown notice	The generated DMCA takedown notice can be downloaded in PDF format.
F25	Artist	Edit generated DMCA takedown notice	Edit the content of the generated DMCA takedown notice.
F26	Artist	Receive new report notifications	Receive new report notifications (push or email).

4. Success Criteria

Define the metrics and conditions that determine if the beta version is successful.

Note: Since visual search cannot detect new reposts in a few minutes, a random number of matches will be manually added between two generated reports.

A match refers to a detected repost of an artwork.

Feature ID	Key success criteria	Indicator / metric	Result
F1	A user signs up with an email and password without application errors	20 sign-up attempts, 0 application-related failures	Achieved
F2	A registered user can log in successfully	20 login attempts, 0 failures	Achieved
F3	Profile information can be accessed	10 profile views, no loading errors	Achieved
F4	Profile updates are saved and reflected immediately	10 updates, all persisted	Achieved
F5	Account deletion removes user data and access	5 deletions tested, no remaining access	Achieved
F6	An artwork can be uploaded and stored correctly	15 uploads tested, all visible after upload	Achieved
F7	Uploaded artworks are visible in the artwork list	15 artworks uploaded, all listed correctly	Achieved
F8	Artwork information is displayed correctly	10 artworks checked, all metadata visible	Achieved

Feature ID	Key success criteria	Indicator / metric	Result
F9	Updating artwork information persists correctly	10 updates tested, all saved	Achieved
F10	Deleting an artwork removes it from the system	8 deletions, 0 residual entries	Achieved
F11	Generating an artworks report detects new reposts and makes them immediately available to the user	10 report generations triggered, all new reposts are visible	Achieved
F12	Detected reposts from all reports are visible	10 reports generated, all matches visible	Achieved
F13	Newly detected reposts are clearly identified	10 reports generated, all new matches correctly identified	Achieved
F14	Global statistics reflect detected reposts accurately	10 reports generated, 0 inconsistencies	Achieved
F15	Latest report statistics match report content	10 reports verified, 0 inconsistencies	Achieved
F16	Matches are correctly associated with artworks	20 matches checked, 7 incorrect links	Partially achieved
F17	Newly detected matches per artwork are identifiable	15 matches checked, 5 incorrect links	Partially achieved
F18	Match details (URL, platform) are accessible	25 matches tested, 20 accessible	Partially achieved
F19	Sorting matches produces correct order	10 sorting tests, correct ordering	Achieved
F20	Filtering matches returns expected results	15 filter tests, 0 incorrect subsets	Achieved
F21	DMCA notice is generated with relevant data	10 notices generated, ~70% fields auto-filled	Partially achieved
F22	Redirection leads to the correct platform page	15 redirects tested, all correct	Achieved
F23	DMCA notice can be copied without content loss	10 copy tests, no formatting loss	Achieved

Feature ID	Key success criteria	Indicator / metric	Result
F24	DMCA notice can be downloaded as a PDF	10 downloads tested, 1 failure	Partially achieved
F25	Generated DMCA notice can be edited	10 edits tested, all saved	Achieved
F26	User receives notifications for new reports	10 reports generated, 8 notifications received	Partially achieved
